

ICSR

international conference on social robotics

alive!

2011

24 and 25 november 2011, amsterdam

Submission Deadline

June 1, 2011

Join Us

November 24–25, 2011

Amsterdam, the Netherlands

The International Conference on Social Robotics brings researchers and practitioners together to report on and discuss the state-of-the-art research in the field of social robotics. The conference focuses particularly on social interaction between humans and robots, the integration of robots into our society, and the design of next generation social robot interfaces and systems.

Full Papers

The conference welcomes original research work that makes scientific, technical, and/or philosophical contributions. We encourage multidisciplinary work that combines knowledge and methods from computer science, electrical engineering, mechanical engineering, psychology, sociology, anthropology, design, and philosophy. We also encourage the integration of scientific and practical perspectives such as how social robots might improve practices in health, wellbeing, rehabilitation, and education. Studies may report on technological developments, innovative ideas, new discoveries, and practical applications.

Tutorials

The conference will also feature tutorials that aim at training the next generation of social robotics researchers. We invite senior researchers to propose tutorials and students and others who would like to expand their knowledge of social robotics and tools for conducting research in this area to participate.

Design Competition

The conference also invites contributions to a robot design competition. The competition will follow the conference theme “alive!” and aim at creating the social robot of year 2020 where robots are integrated into the human physical and social environments and offer their users natural, fluent, and purposeful interactions.

General Chairs

Vanessa Evers, *University of Amsterdam, the Netherlands*
Jaap Ham, *Eindhoven University of Technology, the Netherlands*
Takayuki Kanda, *ATR, Japan*

Program Chairs

Christoph Bartneck, *University of Canterbury, New Zealand*
Bilge Mutlu, *University of Wisconsin–Madison, USA*
